

# Flag Lotto

## Educative game with European dimensions

### Preparations:

- First of all – print all slides as many times as the number of copies you need. /Usually 1 copy is enough/
- For best endurance – Laminate all 4 printed pages.
- Leave the first two pages /with the names of countries as they are. They will be your game boards.
- Cut the other two pages following the lines, to form small rectangular cards – 1 for each flag.
- Now you are ready to play.

### Get started!

#### Easy games:

1. Ask the child to fit the flag cards into the proper places. /You may count the time for fulfilling the task/
2. Let the child separate cards regarding colours /to put aside all flags that have red, blue, green, etc., they can try with combinations like: /red and white, blue and yellow, etc.../ or separate by shapes:/crosses, horizontal or vertical stripes, other figures/.

#### More advanced:

1. Let the children observe the game boards and read to them the names of the countries several times. Then show them different flag cards and ask them to guess whose flag is this.
2. Using the map, talk about directions: East, West, North, South. Let the children observe the countries and their neighborhoods. When you think they know enough, distribute all flag cards on the table face up, so they can be seen, pick a flag and put it on the table. Invite the children for a 4 sided “domino”. They can add to this flag cards on all 4 sides, but they have to pick the right neighbor country flag for the right direction. You may leave the map for facilitating their choice.
3. Feel free to make up your own game! HAVE FUN and let your CHILDREN be HAPPY while becoming CLEVER!
